

Solution Brief: **Foundations**

Simplified, Scalable, and Ready-to-Use
GRC for Growing Organisations

Spreadsheets Don't Scale. SureCloud Does.

Only SureCloud gives stretched teams effortless control across compliance, risk, and audit, in one intelligent and scalable platform.

Risk and Compliance on Autopilot

For scaling teams, success can't hinge on spreadsheets, fragmented tools, or manual processes. Yet many risk, compliance, and security functions are expected to demonstrate compliance and maturity without the specialist resources or enterprise-grade systems to do so.

SureCloud Foundations is the most intelligent governance, risk and compliance (GRC) platform on the market, built for scaling teams with limited resources and a need to move fast. With built-in controls, automated evidence collection, and simple remediation tracking, Foundations makes your GRC program effortless with no coding or consultancy required.

Whether you're working towards your first ISO/IEC 27001 certification or looking to reduce the risks that matter, **FOUNDATIONS** gets you there quicker and keeps you there.

Success doesn't rely on spreadsheets

86%

of growing risk and compliance teams use spreadsheets

"The biggest risk isn't a breach or a fine. It's thinking everything is under control when it isn't."

SureCloud Risk Reckoning Survey

Many growing teams are accountable for risk and compliance but lack the dedicated staff, tools, or formal processes to support them.

Instead, they rely on:

- Spreadsheets and manual communication like email to track risks and controls
- Project management tools not designed for security, privacy, or compliance workflows
- Legacy software that's hard to configure and slow to deploy

The result? Fragmented data, duplicated work, and no clear accountability. As regulatory obligation increases, scaling teams need keep up with expectations of the market and their customers with a solution that delivers effortless compliance in a simple, intuitive platform.

🔗 **FOUNDATIONS** helps growing teams get organised and achieve certification without the cost and complexity of legacy platforms.

A solution for Growing Teams.

Foundations is built specifically for teams that need to scale GRC without the overhead.

Businesses implementing risk and compliance for the first time

Move beyond spreadsheets with a structured platform that simplifies compliance and audit readiness.

Small and growing risk and compliance teams without dedicated resources

Foundations makes risk, compliance and audit manageable with automation and pre-built frameworks, even without specialized knowledge.

Organisations struggling with scattered tools and disconnected data

Consolidate risk, compliance, and policies into one centralised platform.

Companies looking to scale their security and governance program

Start with essentials and expand into advanced GRC capabilities as your needs grow.

The only GRC platform with effortless control.

Only **SureCloud Foundations** gets growing teams organised and accredited by shifting your compliance, risk and security activities to one intelligent, automated and scalable platform.

Designed for effortless control, our no-code platform ensures:

- Quick compliance towards certifications like **ISO/IEC 27001** and **SOC2**
- Reduced audit preparation time and fewer human errors
- Reporting that focuses on the impacts of your decisions
- Continuous assurance through real-time insights and control monitoring

Unlike typical enterprise platforms, Foundations delivers value from day one with no coding and no long onboarding process.

Intelligence-by-Design

Foundations delivers smart and structured processes out of the box including:

- Intelligent control mapping with a “5-in-1” SureCloud Controls framework plus pre-mapped standards to **eliminate duplication and reduce assessment fatigue**
- No-code, flexible reporting across entities lets teams **focus on what’s working**, ensuring continued improvement and better outcomes reported to the board
- Event-based architecture powering deep insights across your compliance and risk activities, capturing context over time instead of just static snapshots so you can **track real changes**

The screenshot displays the SureCloud interface. At the top, there are logos for bax, a blue cube icon, a green 'S' icon, a cloud icon, and a Google Drive icon. A blue button labeled 'Synced to SureCloud' is on the right. Below this, a message states 'Accepted file types: PDF, Microsoft Word, Excel, PowerPoint, text files, JS'. A document entry 'Document.doc' is shown with a status 'File(s) successfully synced.' and a timestamp 'Updated: 21 C'. Below the document entry, there are sections for 'Document Collection Settings' and 'Start Date'.

Compliance at your fingertips

Say goodbye to manual effort with automation of key workflows:

- Automated evidence collection and continuous control monitoring (CCM) **reduce time spent on recurring manual tasks** letting you focus on improving strategy
- No-code configuration of workflows and fields lets you **run compliance on YOUR practices**, not just best practice - no developer input needed
- Smart questionnaires and document review use **AI to inform improvements and get faster accreditation**
